Battery - what kind of battery does Milo™ use? How long does it take to fully charge Milo™?

Team - 2023-06-05 - Product FAQs

Milo™ uses a high-quality lithium polymer rechargeable battery. Just like your phone battery, it is fully integrated allowing Milo™ to be completely waterproof. The battery lasts a full day on a single charge and takes about 90 minutes to fully charge from empty. Your Milo™ will charge more quickly when powered on.
