What is the Milo™ range?

Team - 2023-06-05 - Product FAQs

Milo™ range is up to about 2000 feet / 600m between any two units for multi-way voice, depending on terrain and conditions. The range is extended by the MiloNet™ mesh network if your group spreads out farther. We are adding a Long-Range-Mode for situations where you are not near your group but still need to keep in contact
